SUMMARY

Systems Engineer experienced in systems analysis, SQL, and process documentation. Skilled in troubleshooting, data validation, and supporting cross-functional teams to ensure consistent and efficient operations. Brings a methodical and collaborative approach to resolving technical issues and improving system reliability.

EXPERIENCE

Systems Analyst | EDESUR Dominicana S.A

April 2023 - Present, Santo Domingo, Dominican Republic.

- Conducted root-cause analysis to address system issues and implemented fixes that improved platform stability.
- Wrote and optimized SQL queries and scripts to support reporting and data validation across internal departments.
- Partnered with cross-functional teams to define and document business needs, contributing to several improvements in system workflows aligned with stakeholder goals.
- Provided Tier 2 support for enterprise applications, supporting user satisfaction through consistent improvements and well-structured documentation.

Programmer Analyst | HostSeven SRL.

July 2022 - April 2023, Santo Domingo

- Document system processes and perform QA testing with Jira and Confluence.
- Built responsive email templates with HTML/CSS.
- Trained and supported internal users, ensuring smooth software operations.
- Addressed and resolved technical user issues.
- Enhanced SQL queries and automated data validation routines, increasing reporting efficiency and supporting more reliable business intelligence workflows for HostSeven SRL.

Technical Support Intern | HostSeven SRL.

October 2019 - July 2022, Santo Domingo

- Handled support tickets, customer queries, and system issues.
 - Generated MySQL-based reports using ETL processes.
 - Automated data migration processes by injecting structured information into system templates, enabling efficient transfer from legacy platforms and client-existing platforms to company-provided systems while maintaining data accuracy and consistency.
 - Participated in software troubleshooting and maintenance.
 - Developed internal documentation and user guides to support self-service troubleshooting, increasing client support efficiency and reducing average response time by 30%.
-

PROJECT

Web POS System for Furniture Store | Mojarra Furnitures

August 2020 - December 2020

- Engineered a web-based POS system for a mid-sized furniture retailer as part of a 5-member team, enhancing transaction processing speed and user navigation experience.
 - Integrated inventory synchronization and reporting modules using PHP (MVC) and MySQL, supporting real-time stock updates.
 - Applied agile methodologies to structure sprints and track progress, simulating a real-world development cycle.
 - Strengthened practical knowledge in full-stack development and improved team collaboration in a high-stakes academic setting.
-

EDUCATION

B.S. in Computer Systems Engineering | Universidad Dominicana O&M

Santo Domingo, 2020

CERTIFICATIONS

Introduction to Python | Datacamp

2025

Intermediate Python for Developers | Datacamp

2025

Introduction to Snowflake | Datacamp

2025

Full-Stack Web Development Bootcamp | Udemy

2025

The Complete JavaScript Course 2025: From Zero to Expert | Udemy
